Lab Alignment

Lab	Topic / Outcome	Slide	Key acceptance evidence
Lab 01: Prompt-to-Image Visual Brief	Topic 1	30	At least three controlled prompt iterations are retained.; The selected JPEG has a clear focal point and intentional copy space.
Lab 02: Design Principles and Prompt Refinement	Topic 1	31	PSD contains guides, editable type and separate candidate layers.; The final hierarchy remains clear at thumbnail size.
Lab 03: Composition and Style References	Topic 2	51	Baseline, composition-only, style-only and combined results are present.; Only the intended reference condition changes between comparisons.
Lab 04: Storyboard and Task Flow	Topic 2	52	Every frame has a purpose and transition caption.; Task flow includes ownership and an approval gate.
Lab 05: Generative Fill: Directed Inpainting	Topic 3	72	Original pixels remain protected.; Generated edits are on named generated layers with editable masks.
Lab 06: Background Replacement and Harmonize	Topic 3	73	Subject and placed element masks remain editable.; Light, perspective and contact shadow are visually coherent.
Lab 07: Generative Expand for Channel Ratios	Topic 3	74	All three aspect ratios are delivered.; Focal hierarchy and protected subject details remain intact.
Lab 08: Reference Image and Multi-Prompt Composition	Topic 3	75	Protected identity and background regions remain unchanged.; Reference asset and selected variation are retained with the PSD.
Lab 09: Restoration, Critique and Colour Strategy	Topic 4	96	Original, AI output and manual corrections remain separately reviewable.; Tonal range avoids unintended highlight/shadow clipping.
Lab 10: Wellness Campaign Capstone	Topic 4	97	The package demonstrates the full workflow.; All adjustments and generated layers remain editable and documented.
